About Me

Front-End Developer with a passion for creating visually stunning and user-friendly web applications. Proficient in HTML, CSS, JavaScript, and front-end framework like ReactJS with a keen eye for design and a commitment to delivering high-quality user experiences. Adept at collaborating with cross-functional teams to translate client and stakeholder needs into responsive and engaging web interfaces.. Seeking opportunities to contribute creativity and technical expertise to innovative projects and drive user satisfaction through exceptional front-end development.

Projects

BMI CALCULATOR
- Built using HTM5, CSS3 and javascript.
- This app calculates the Body mass index of the user. It also shows if the user is Healthy or Underweight

QR CODE GENERATOR
- Built using HTML5, CSS3 and javascript
- This app generates different qr code through API calling after entering Name or URL, upon scanning it shows the exact name or site.

IMAGE SEARCH ENGINE
- Built using HTML5, CSS3, javascript.
- It generates random images of the thing entered by user, the images are fetch through API calling.

TODO LIST APP
- Built using ReactJS.
- It comes with the functionality like writing , editing, deleting and saving the task on the todo app.

WEATHER APP
- Built using ReactJS
- This weather app shows the temperature, Humidity, wind velocity, pressure of the city/county name entered by user. Data is fetched through open-weather API.

SHOPPING E-COMMERCE WEBSITE
- Built using ReactJS and redux toolkit.
- This is an e-commerce website with different product categories with add to cart functionality and shows total items added to the cart with total payment generated.
